Dr. Joshua Lederberg
Department of Genetics
University of Wisconsin
Madison, Wisconsin

Dear Dr. Lederberg:

Dr. Stanier and Dr. Elberg inform me that we might hope to interest you in offering a course in bacterial genetics during the summer session of 1950. As I understand it, this would be a 3-unit undergraduate course and at the same time, you would be available for a 1-unit graduate seminar.

Would you be good enough to send me at your early convenience an outline of the subject matter to be covered so that I can submit the course to the proper committee for approval. When once approved, I can then ask the Dean, College of Letters and Sciences to send you an invitation stipulating the amount of salary and traveling expenses. Will you be available for either of the two sessions? The first one runs from about June 20 to July 30 and the second from August 1 to September 10. If you have a preference in this connection, please let me know and I'll do everything possible to get approval for the period you stipulate. I hope that things will work out so that we may have the pleasure of having you with us.

Sincerely yours,

A. P. Krueger, M. D.
Chairman
